April 2nd 2012, Central London

GUEST SPEAKERS

Superintendent Alan King, CBRNE Coordinator, Metropolitan Police, UK

Wayne Harrop, Director of the Centre for Disaster Management (Applied Research Group), Geography, Environment and Disaster Management, Faculty of Business, Environment and Society, Coventry University, UK

Russ Mansford, Strategic Ambulance Adviser, Emergency Preparedness Division, UK Department of Health, UK

Masterclass Leader:

Brigadier General (ret'd) Galatas Ioannis, MD, PhD, MA, MC
 Consultant in Allergy & Clinical Immunology, Medical/Hospital CBRNE Planner, Senior Asymmetric Threats Analyst, Editor: CBRNE-Terrorism Newsletter Athens, Greece

Overview:

Following a terrorist CBRNE attack in urban/megapolis environment approximately 20% of those involved will remain in place (dead, severely wounded/contaminated) while 80% will flee to all possible directions seeking for medical advice. In addition, the ratio between contaminated vs. worried well is 1:5 and this will overwhelm hospitals in a very short time leading to collapse. Based on Tokyo sarin experience, all hospital and clinics in a big city will accept contaminated casualties. Therefore, all of them need to be adequately prepared to deal with CBRNE casualties. It is generally believed that there is a gap in preparedness between the ambulance service and the hospitals' emergency services in London and other major Olympic Cities. Specialized questions on hospital CBRNE defense will be set and authorities involved will be asked to address them. The main goal of this masterclass is to identify gaps in preparedness and assist hospital to correct them the best way they can. An anthropocentric approach in planning will be proposed and the experience from previous Olympic Games (2004) will be shared with the participants. Certain proposals for now and the near future will be analyzed and discussed further.

Benefits of attending:

Upon completion of the Masterclass the audience will be able:

- To comprehend what is expected to follow a real terrorist CBRNE event in urban/megapolis environment
- To incorporate an anthropocentric approach in CBRNE defense planning
- To analyze the needs deriving from hospital CBRNE planning (manning, equipment, procedures, interoperability)
- To identify the gaps in hospital CBRNE preparedness
- To establish a cooperation network between major hospitals' CBRNE defense strategies

Who should attend?

- Department of Health, Ambulance Service
- Medical CBRNE Planners
- 2012 Olympic Games Security Advisers
- CBRNE Market Representatives (PPE, decontamination facilities)
- NHS Hospitals' Directors and Deputy Directors
