INGV - EARTHQUAKE

INGV - TERREMOTI

La mappa riporta i terremoti di magnitudo superiore o uguale a 2.0 localizzati in Italia dalla Rete Sismica Nazionale dell'INGV. Nei casi in cui un evento sismico sia stato risentito, esso viene comunque riportato nella lista. Informazioni sui terremoti di magnitudo inferiore a 2.0 possono essere estratte dal database ISIDe. Vengono inoltre riportati terremoti rilevanti in altre zone del mondo. I valori delle coordinate ipocentrali e della magnitudo rappresentano la migliore stima con i dati a disposizione al momento. Eventuali nuovi dati o analisi potrebbero far variare le stime attuali della localizzazione e della magnitudo.

USEFUL INDICATIONS TO FACE THE EARTHQUAKE EMERGENCY (IN ITALIAN) TAKEN FROM AN ARTICLE WRITTEN BY OUR FORMER STUDENT, DR. LUIGI SALUCCI, PROFESSIONAL JOURNALIST
